32	Is there a regular consultation with the employees			

33	Is there a quality manual	
34	Other	
35		
	Routing and construction	
36	Are the different rooms like disinfection, packaging and dressing room strictly separated	
	Are there person locks between the rooms	
37	Are there over-step-hurdles in the dressing room	
	Is there a fixed route for acceptation, storage and distribution of sterile goods	
38	Is there a separated textile packaging room	
	Is there a recreation and instruction room	
39	Is there a lock for different goods	
	Is there a pressure difference between the rooms and enough ventilation	
40	Is the disinfection room separated by a lock	
	Other	

41			
	Production		
42	Are there year figures available		
43	Are all product witch are to be sterilized documented		
44	Is there a procedure for new materials		
45	Is there a procedure for hired or loaned instruments		
46	Are disposables being reused		
47	If yes, is this documented		
48	If yes, is there a manufacturers approval		
49	Is there sterilization being carried out for third parties		
50	If yes is this documented		
51	Is there sterilization done by others		
52	If yes, is this documented		
53			
54			
55			

	Sterilization			
56	Is there log(book) for each sterilizer			
57	Is there an initial validation report			
58	Is there an yearly re-validation being conducted			
59	Do the sterilizing processes comply with the guidelines			
60	Does the sterilizing equipment comply with EN 285			
61	Is the Bowie Dick test being carried out every day			
62	Is there a vacuum leakage test carried out minimal once a week			
63	Is there regular maintenance on the sterilizers			
64	If yes, is this documented			
65	Is there a formal release every process			
66	Is this release being checked by the authorized person			

67	Are all sterilized products registered every cycle		
68	Is the sterilized load inspected after each cycle		
69	Are all products labelled with expiration date and lot number		
70	Are there operating manuals available for the machinery		
71	Are there loading instructions on writing		
72			
73			
74			
	Cleaning	•	
75	Does every washer-disinfector have a log(book)		
76	Is there a log(book) for every washer-disinfector		
77	Is there a yearly re-validation being carried out		
78	Do all the processes comply with relevant guidelines		
79	Does the technical performance comply with relevant guidelines		

80	Is there regular maintenance on every washer-disinfector being carried out	
81	If yes, is this documented	
82	Is there ultra-sonic cleaning equipment available	
83	Is there compressed air spraying equipment available	
84	Is there a de-mineralised water gun available	
85	Are there enough personal protection devices available	
86	Such as:	
87	Gloves in different sizes	
88	Hearing protector	
89	Watertight over-coating	
90	Safety spectacles	
91	Splash screen	
92	Safety eye shower	
93	Is there an workplace where one can sit during the manual cleaning	
94	Are there operating manuals for the cleaning equipment	
95	Are there loading instructions	

96		•	
	Control and packaging		
Clean	ing		
99	Is the cleaning and disinfection process being checked		
100	Are the loads dry after each process		
101	Are the instruments clean after each process		
Contro	ol and packaging		
102	Are the instruments being opened en spread out for control and functionality checks		
103	Are the different sets put together with the help of an document describing the contents		
104	Are all the sets described		
105	Is there a registration of the set composer		
106	Is packaging done according to the packaging guidelines		
107	Is there indicator tape used		
108	Are the seals of the pouches checked daily		
109	Are there log(books) of the sealing equipment		

110	Does the sealers comply with relevant guidelines		
111			
112			
113			
114			
	Transport and storage	1	
115	Is the transport of sterile and contaminated goods strictly separated		
116	Are these transports being carried out with a closed cart		
117	Is there an acceptance registration for the sterile goods received for storage or distribution		
118	Is the transport material cleaned en disinfected regularly		
119	Are the transport carts separated especially for sterile and contaminated transport		
120	If not, are they cleaned en disinfected after each transport		
121	Are all delivered goods being registered		
122	Is there a sterile storage room		
123	Is everything stored clear of the floor		
124	Are the storage shelves easy to clean		

125	Is the cleaning of the shelves documented in frequency and cleaning method	
126	Is the "First In First Out" principal being used	
127	Is there a climate and pressure control in the sterile storage room	
128	Are sterile and non sterile products being stored separately	
129		
130		
131		
132		
	Working conditions	
133	Is there an policy document on working conditions	
134	Is there an safety document of all used chemicals	
135	Is there an accident registration and protocol	
136	Are the working tables adjustable in height	
137	Can it be prevented to lift above shoulder-height and below knee-height	

138	Can it be prevented to turn more than 90 degrees while executing the different activities		
139	Is there daylight available in the working- and recreation room		
140	Are the floors not slippery even under wet conditions		
141			
142			
143			
	Management		
	Who is the highest responsible person on the CSSD		
	□Head CSSD		
	□Head OR		
145	□1e assistant		
	□Other		
146	Who is responsible for the budget		
146	□Head CSSD		

	□Other		
147	Is the instrument-budget included		
148	Is there structural consultation between the head of the CSSD and his manager		
149	Is there structural consultation between the head of the CSSD and the authorized person for sterile medical supplies		
	What is the title of the next higher manager		
	□Cluster manager		
150	□Head OR		
	□Other		

151	Is there enough opportunity to visit meetings, symposia ect. to keep up the knowledge	
	How many times is something visited in a year	
152	□1 x □2 x □3 x □4 x □5 x □6 x □7 x □8 x □more
